Fred was on time with his appointment and did a very thorough inspection of a new furnace installation I had requested. His quote was very competitive but the fact that he had to drive an additional 1 1/2 hours each way made it slightly higher than a local company that I decided to use instead. Thank you Fred for your honesty, integrity and driving the distance for a no charge quote.

Todd from Atlanta Energy Solutions has been awesome! He explained what needed to be done thoroughly, laid out different options, and fixed all my issues competently. His customer service skills are excellent. I highly recommend. My days of searching for a fair, competent HVAC company are over!

Todd was absolutely amazing! He was courteous, fast, and got the job done. I'm very thankful! I will definitely recommend him to anyone who needs an HVAC repair.

I noticed another review from a home warranty client. I actually found this company through my warranty company and they are by far the best company I've ever worked with through the warranty contracts. I've had plenty of other companies who don't show up at all and it takes weeks to fix my unit. Three years ago it took one company over six weeks in the middle of summer. Todd has them all beat hands down!

I called Atlanta Energy Solutions to get a 2nd opinion regarding my A/C after coming home to a warm home. AES came highly recommended by several neighbors. I totally agree! Todd was extremely professional. He returned my call after "normal" business hours and set up an appointment for the next morning. He explained my options and even replaced a bad part that the previous company failed to mention, especially since they installed it. Todd is very patient on top of being very professional. Cost of services very reasonable. Highly recommend!!!

On Sunday, we came home from vacation to an 87 degrees house. We called a 24/7 emergency company who was somewhat helpful and told us our unit was shot; their prices were outrageous. On Monday I called our usual Heating and Air guy who couldn't come until Wednesday so I called Atlanta Energy Solutions; Todd is the best! We ended up having to get a new unit which is what Assured Comfort told us yesterday but they were so much more expensive; double the price! My experience with Todd of Atlanta Energy Solutions was very pleasant, he is a stand up guy. Very professional and reasonable.

I can't say enough about Todd. My downstairs AC went out just in time for Atlanta heat. I called a big name HVAC company in the area. Before they had even diagnosed my problem they were trying to sell me a new system. By the end of the day their repair quote was enough to nearly pay for a new system and they continued pressing me to buy a new system. I almost fell for it but I decided to try Atlanta Energy Solutions suggested by a coworker. Todd got me up and running again for a reasonable fee. I will be a repeat customer in the future.

My AC quit working after a lightning strike so I was worried it was a major problem. I found Atlanta Energy Solutions through neighbor recommendations and Todd came the next day after others said it would be a week. He was thorough, explained the problem and offered solutions to fit our budget. Thank goodness it was relatively minor and he went above and beyond to fix us up with no pressure. (on a super hot weekend day I might add) The AC works BETTER than before due to him pointing out some maintenance that needed to be done. I'd definitely call next time the need arises.

Our AC went out in the midst of a string of 95 degree days and found ourselves having to have a slumber party in our basement with a two year old and 9 month old to avoid the 85 degree upstairs. Needless to say, we were in a bind to get the hvac fixed in a hurry. We spoke with Todd who came over to look at our system within 24hrs and took the time to explain our options (patch it up and hope it lasts until winter, as well as 4-5 different replacement options). We went with an option to replace the AC and Todd was back a few days later to take care of it (all while we were out of town so coming home to a working AC was amazing). It was a huge relief for someone to take the time to explain things to us given that it's a pretty large purchase. My wife and I can't recommend Atlanta Energy Solutions enough. Felt taken care of and treated fairly!

I highly recommend Atlanta Energy Solutions. I saw the great reviews on Nextdoor so I decided to call...and I'm glad I did! Todd Jeffcoat is awesome!! My A/C went out on "hot" Mother's Day Sunday evening...to my surprise Todd answered the phone. And he was at my home the next day (Monday morning)...checked my unit and gave me my options. I was back up and running with new parts within a few hours! He was quick, reasonably priced, and thorough! He came back the next day to service my units and prep them for the Summer, at no additional charge. He even bought his own vacuum and cleaned up behind himself! Todd's my new HVAC guy...oh and he also works with gas fireplaces! Thanks for your great customer service Todd!!

Atlanta Energy solutions is the best HVAC company I have experienced in a while and I have worked with several. The technician was professional, transparent, knowledgeable and affordable. He serviced my HVAC while I was on vacation and when we returned home a week later our AC worked like it was brand new! I would recommend Atlanta Energy Solutions for all of your HVAC needs. They truly look out for the best interest of the customer.
