The technician was very professional. He cleaned up after himself. He was very informative about what filters were best for my unit. This was the first time I used this company. I will definitely use them again next year to do maintenance on my AC unit.

Very professional service from sales to repair and communication. We are very satisfied with the visit and signed up to the maintenance plan. Tyler performed the repair and I had full confidence throughout the process. Big thanks to Annic and the team.

It was a very positive experience. Starting with the friendly voice when I called. She (sorry I forgot her name) was friendly and upbeat. She was also very well informed. On the day of my visit, Shawn was very courteous, and professional. I will recommend their services to all of my friends and family.

I'm very happy and impressed with this business: they have been all that you hope for when dealing with an AC/heat pump installation. The customer service has been exceptional, from initial contact and appointment set up to the choice of system, installation, billing department - everyone has been helpful, professional, reliable and friendly. They would be a good model for other companies to emulate.

Excellent company and really excellent service. They were able to come quite quickly during the fall heating season when all HVAC companies are really busy. Very professional, and very responsive, also very clear about when they would arrive. And, very friendly. Will be using them in the further for sure.

The technicians came and assessed the problem they were very clear on what needed to be done and gave me a clear quote I then made an appointment to do the repairs . when they came they took all the necessary safety precautions due to covid for safety. they were efficient and very polite when interacting with me and I would highly recommend using their service,I know I will in the future!!! now my house is nice and cool and everything is working great!! THANK YOU CIRTECH!!!

I was very impressed with the service starting with Annick the secretary and the technician Tyler. I phoned this morning requesting for a technician because we are in a heat wave and our unit broke yesterday pm. I have asthma and can't tolerate the heat for too long. I also mentioned to Annick that we were rip off by the previous company that installed our new unit last year, they never honour the garantie and never give us a corrected invoice, therefore we lost the subvention given by Hydro. In that case, that company Cirtech CVAC was so understanding and empathic that they send someone the same day. I never had a response from any other company today or last year in July when we had that heat wave. I gave them a 10/10. Thank you so much for your excellent and rapid service

Courteous, professional and fair. They take the time to explain my options and give me their best recommendations. Best of all, they actually show up when they say they will which can't be said for all service companies. Highly recommended!

This company came through for me in a heatwave. I called several companies and never received the outstanding service that I got from this company. The technician Shan went out of his way to clean my unit because of the heatwave. Under normal circumstances this would have been a second appointment. The client representative Annik was so professional, empathetic and courteous. This service is exceptional. I have a Hitachi wall unit and trying to find someone to service this unit was very difficult until I found them. Thank you!!!! 😊😊😊

Justin of Cirtech cvac, quickly found the problem with our heat pump. It was a burned out capacitor and after replacement he again tested all the components. Justin advised me that the contactor also showed signs of pitting and blackened terminals. He advised me up front, the cost to change each item, so each was replaced. I greatly appreciated the honesty and excellent service given. I would certainly recommend Cirtech, to anyone experiencing cooling or heating problems. Ronald Dawson, St. Laurent
