Fred was on time with his appointment and did a very thorough inspection of a new furnace installation I had requested. His quote was very competitive but the fact that he had to drive an additional 1 1/2 hours each way made it slightly higher than a local company that I decided to use instead. Thank you Fred for your honesty, integrity and driving the distance for a no charge quote.

Just moved into a new home and needed an AC unit installed and our furnace looked at. Fred Clark was very up front and honest when it came time for our quote. Him and his team were on time on installation day, professional, and worked non stop too install our new furnace and AC unit. Definitely recommend using them!

I am very grateful that Clark's Mechanical was able to help my family when our boiler system went out.

The first call I made was to a competitor. The woman on the line said they were not taking new boiler customers and hung up.

The second service I called sent a technician who quoted me over \$1,500 for a small part that seemed to be working correctly.

It was nearly 3pm on a Friday when I called Clark's Mechanical. The dispatcher said they wouldn't be able to send anyone out until the next day. When I explained that my family (including my pregnant wife and two toddlers) was without heat and the temperature was quickly dropping, the dispatcher said "We can't have your kids in a cold house. My husband will be there right away, he's the owner."

Fred arrived a short time later to inspect our heater and realized the previous technician misdiagnosed the issue and the actual problem was a much cheaper fix.

After performing the necessary repairs, we realized a pipe had burst from the freezing temperature. Fred took the time to isolate that pipe line to ensure the rest of the house remained heated.

After the pipe was repaired, Fred returned the next morning, reconnected the piping system, purged the unit, and ensured the entire heating system was working properly with no extra charge.

My family and I are grateful for Fred and Clark's Mechanical. I would proudly recommend them to anyone in need of HVAC services

Fred was extremely helpful and fantastic. He was on time even though the weather conditions were not favorable. Very professional and knowledgeable about his business and cares about his customers. He's very honest and would highly recommend him for any heating and and AC needs.

I am posting this review for my father, Jeff S.: A week ago I contacted Fred and Rachel Clark. The owners of Clarks Mechanical. To install a new furnace in my house. And to replace or repair the duct work in my attic. In addition, they wrapped all of the attic ducts with insulation. Fred and his friend and coworker Kasey did a great job! They were both efficient and pleasant to deal with. As was Rachel with the appointments, paperwork, etc.. All of the work was completed in one day. And the old furnace was hauled away. All of my rooms are much much warmer now. And the new furnace is quiet.(located near my bedroom). I could not be more pleased with everything.

Called in a Friday to inquire about installing A/C. Fred was there the following Tuesday for a fair estimate. Setup the install and a week later we are enjoying the cold air. The installation crew and electrical were done with minimal interruptions. The crew kept a clean work space. Clarks mechanical is on my go-to list for anything HVAC related work.

We're real estate investors (our other business) and Clarks Mechanical is a company we want to work with forever! Fred responds to our phone calls quickly, keeps in touch with us about his schedule and timing, and he recommends what needs to be done, rather than upselling on services we don't need. His prices are very reasonable and fair. He is trustworthy. And he is grateful, humble, and kind.

I am out of state and needed someone to evaluate what was wrong, it was determined that the thermostat needed new batteries. The only thing that would have made a better experience would have been if the repair guy had 2 batteries to put in the unit, he only had 1. Everything else was great!

We had three company's come out and give opinions on our furnace. Clarks was the most prepared for the visit. He was the only company who was able to see us the same day as well which was amazing. He gave us three options for replacing the furnace so we could find something within our price range. After one company turned the gas to our furnace off because it was "unsafe" Clarks reassured us that that though it needed replacing it did not need to be off and took care of us so myself and my two little girls didn't spend another night freezing.
