We used Robert Noland and his company to install HVAC in my new construction house around 2 years ago. System is still working great today. He took the time on the front end to determine exactly what my house needed and saw it through to completed. Great company. Even better family. The only reason I even saw this and put in this review was because I was recommending them to a co-worker.

My air conditioner had quit cooling. My pastor called Noland Heat and Air on my behalf because they are the company that services the churches heat and air systems. And have always done an excellent job. They came to my home right away. They resolved the problem quickly and now my home is nice and cool. They were very professional, cordial, and respectful. I wholeheartedly recommend them and if needed I will call them again.

Once you find a company that takes care of you, you're a customer for life. From their first visit years ago, they were very professional and personable. They answered all of our questions, made recommendations based on what they saw, but also don't try to squeeze money or service out of you. They give you honest timelines for when you're going to need parts/service based on what their inspections find. We've been very pleased with them. No wonder they have grown so much over the years. I highly recommend them to anyone that needs their unit to be serviced, repaired, or installed.

Our AC suddenly went out on Friday. We called and a Tech. Was at our home within two hours. We needed parts he didn't have but got air going temporarily. Monday morning they were back with parts and had our air back on before noon. The friendliness and fast and courteous service was unbelievable. I highly recommend Them and I wouldn't hesitate to use them again. Ken Zuber, Beebe Ar.

Noland Service Company is top notch. I met Robert a few years back on a tour of an HVAC Distribution center. I could tell immediately that he was one of the good ones. I'm also an HVAC Business owner and we spent hours discussing how to actually solve customers problems, not just sell them new equipment. I continue to be impressed with the extensive training that he provides to his team through weekly sessions. If I ever needed any air conditioning or heating work done on my personal home, and couldn't do it myself...I'd trust him or any member of his team implicitly.

A friend at work told me of a great experience with Nolan's H/A. They had excellent customer service both on the phone and in person. Easy to talk to. Repaired an unrelated item that they felt they had damaged. Good integrity.
