All I have to say, is that when it comes to heating and air conditioning the guys at Smart Heating and AC know their stuff! They had me back up and running in no time. They had the part on their truck already which was super convenient. Before my uncle recommended that I use them, I called 6 other companies who told me they could not come out for 4-10 days out. They came out same day and did my repairs on the same day! They were Super nice, thorough and polite. They are my new go to HVAC Company, plus I am referring them to everyone I know, including anyone who reads this, you're welcome! :)

We had to upgrade our old furnace and AC so we decided to look around and call a couple companies to come and give us a quote. We decided to go with Smart heating and air, their prices were upfront and fair. We got our systems installed in a very professional manner. All the technicians wore masks, they used foot covers and put down cloths to protect our floors. After they installed they tested both ac and heater to make sure it was working. The cool thing about it is that we can control the temperature with our nest app without getting up with our phone. I love this bc I was always forgetting to turn off our system but now I can do it anywhere. I totally recommend this company. We will use them for any HVAC related concerns.

Mike and Susie were incredibly responsive and fast. They have a great software system that allows you to know when they're arriving which is super helpful, instead of just giving you a window of arrival like many other suppliers! Mike was on time, helpful and knowledgeable. Our heating system stopped working and he came the next day to assist. Replaced a part and the first night actually the system still didn't work. Mike came out the next day first thing in the morning and really did some thorough investigation to help us diagnose the issue. Very responsible, sincere, and helpful. We are very grateful to have found him!

Mike and the Team and SMART Heating and Air Conditioning are first class from top to bottom. My AC unit was in need of a service check up and From the moment that I contacted the SMART team I could tell that I was going to be in great hands. Susie the office manager was so friendly and was able to get me on the schedule quickly. When Mike came to my house to assess my AC unit I could tell that this was a guy who knew what he was talking about. He walked me through my whole system and explained to me how everything was working and what he could do to give my system the tune up and boost in performance it needed especially before the hot summer months arrive. What I appreciated the most about Mike was his customer service skills. He told me what he my system could use but even better he didn't try to upsell me with equipment or services that I didn't need. Even the day of my appointment when I ran into a scheduling issue that put me home later than I thought, Mike was able to work his afternoon schedule around and fit my appointment in! That's top notch! Thanks to Mike and the team at SMART Heating and Air my cooling and heating system has never ran better. If you are looking for a great HVAC company look no further than the SMART team. They are awesome!!!

Smart Heating & Air Conditioning saved our day! Our heat went out during one of the coldest winters. My husband and I called several HVAC companies in area who were unable to help us immediately. Mike was not only able to send an emergency technician same day, but was able to come with in 4 hours. Our problem was repaired quickly and our heat returned within 35 minutes of their visit. Highly recommend business that we will plan on working with in the future.

I called Smart Heating and Air Conditioning for a quote to replace my AC unit. Mike, came out and took his time with the inspection, and also took his time explaining to me everything that needed to be done. The pricing is competitive, but definitely worth the money. The whole install went perfect.

The technician came the next day when my forced air heating unit stopped. He wore protective covers on his shoes to protect our home. He crawled under the house, diagnosed our system, replaced the fuse that was broken and we were back on! Very professional, on time, trustworthy. I recommend this company for your heating needs. They earned a lifetime client.

We had an excellent experience with Mike and his crew, including his office staff. Mike is a serious perfectionist, and his mind is on total customer service. He made sure we received the best equipment suited for our home, and the installation was a one-day effort. Mike took the time to draw us full pictures and written definitions of all the jargon and options for choosing a replacement for a 25 year old system. Smart Heating and A/C couldn't have been more awesome. Before, during and after completion, the company is very responsive on all matters. Mike has tons of experience working with other HVAC companies, and now owns his company. I have recommended them to family and friends. They are super cool to work with - the best!

Happily leaving a review even though they never came to my home. Another company gave a diagnostic and said I need a new blower motor for my AC. I looked for quotes without another diagnostic fee, which is rare to get, and Mike called with a reasonable, cheaper quote. I mentioned I was considering fixing it myself (YouTube video) and he said I could probably do it, and offered to be on call if I need help. Very generous offer!

He was right, I was able to swap the part, but it still didn't work so I ended up reaching out again. He walked me through what needed to be done and I've got cold air blowing again! This is next level customer service, he was very friendly and cared about getting things working right for me.

I'm definitely giving Smart Heating and Air Conditioning a call for my future HVAC needs and would be happy to have them working on my system. Thanks again!
